

Hands-on Activity 1.2 Formatting Text and Organizing Data	
Course Code: CPE-025B	Program: Computer Engineering
Course Title: Software Design 2	Date Performed: January 12, 2026
Section: BSCPE32S4	Date Submitted: January 12, 2026
Name: Adrian Justin Bulambao	Instructor: Engr. Neal Barton James Matira
1. Discussion	
Headings - Module 2 introduces the usage of headings in HTML, wherein headings provide structure and hierarchy to a web page by indicating which sections are more important or subordinate to others. Furthermore, headings are composed of 6 levels, which are h1, h2, h3, h4, h5, and h6, with h1 being the largest or the most important one and h6 being the least important and the smallest one. Lastly, headings are crucial because search engines use them to determine a web page's topic and index (categorize) it appropriately. Thus, by making it simpler for search engines to find and rank pertinent content, appropriate use of HTML headings can enhance a web page's search engine optimization (SEO). Paragraphs and Text Formatting - Moving on to the text formatting section, Module 2 introduces many HTML elements that can be used to format text. The <code><p></code> tag, which is one of the most frequently used HTML elements, indicates that the enclosed text should be treated as a separate paragraph. By default, browsers apply vertical margins above and below the paragraph to create visual separation. As a block-level element, the <code><p></code> tag occupies the full width of the container in which it is placed. Aside from paragraph tags, there are other elements more than the provided example below:  The screenshot shows a web browser window with the address bar displaying 'C:/Users/Kurt/Documents/HTML_CSS/text_formatting.html'. The page content includes a heading 'Text Formating' (note the typo) followed by several lines of text demonstrating various HTML formatting tags: normal text, bold text, italic text, underlined text, text with a strikethrough, text with a background color, small text, subscript text, superscript text, monospace text, and text with a background color. Moving on to the tags elements. Module 2 also talks about the purpose of <code>
</code> which is to provided empty line space and <code><hr></code> to provide a horizontal line on the website page.	
List	

- A key component of HTML, lists are used to display data in an orderly and structured way. They enable you to put together a collection of connected objects or bits of knowledge. HTML can be used to create a recipe, a shopping list, a to-do list, or a list of interesting facts. In HTML, lists come in three different varieties:
 - **Ordered list** : used to display a list of items in a specific order.
 - **Unordered list** : are used to display a list of items with no particular order.
 - **Definition list** : used to display a list of terms and their definitions.

Tables

- The HTML tables, which are used to display data in rows and columns, are finally introduced in Module 2. They are an excellent method for presenting data in an orderly and structured manner. Additionally, each intersection of a row and a column is referred to as a cell. Tables are composed of rows and columns. Text, images, or other HTML elements can be found in each cell of a table.

2. Materials and Equipment

Computer: it is used to access the course and run the website.

Internet Connection: it is used to access course content

Visual Studio: it is used in creating the website.

3. Procedure

Scenario

Welcome to the world of culinary exploration! You've been chosen to embark on an exciting journey as a web developer for "**Taste of Travel**," a vibrant online platform that celebrates global cuisine and culinary adventures.

Your mission is to design a captivating webpage that not only tantalizes taste buds but also inspires wanderlust through immersive storytelling and visually stunning presentations of recipes from around the world.

Instructions

Follow the instructions below to create the webpage step by step:

1. Set Up the Basic Structure

- Start by creating a new HTML file and name it index.html.
- Begin your HTML document with the DOCTYPE declaration to specify the HTML version you'll be using – HTML5.
- Then, enclose the entire content of your webpage within the <html> tags.
- Specify the language of the webpage as English.

2. Head Section

- Create the <head> section of your HTML document. Inside the <head> section, set the title of your page to "Taste of Travel" using the <title> tag.
- Add meta descriptions for your page using <meta> tags. Include the following:
 - Name: Set the name attribute to "description".
 - Content: Set the content attribute to the following description of the webpage: "Embark on a culinary adventure with Taste of Travel, exploring global flavors and recipes."
- Set the character encoding for your webpage to UTF-8 using the <meta> tag. This ensures proper display of special characters.

3. Body Section: Headings and Text Formatting

- Create the <body> section of your HTML document.
- Heading and Text Formatting:
 - Craft engaging headings that transport visitors to exotic destinations and entice them to discover new flavors. Specifically, create headings using <h1>, <h2>, and <h3> tags, with titles such as "Discover the Flavors of Thailand" (for <h1>), "Tom Yum Goong: A Spicy Thai Delight" (for <h2>), and "Ingredients:", "Preparation:", and "Cooking Tips:" (for <h3>).
 - Write a paragraph (<p>) describing Tom Yum Goong, emphasizing its bold flavors and aromatic spices: "Tom Yum Goong is a classic Thai soup renowned for its bold flavors and aromatic spices. This hot and sour soup features a tantalizing blend of lemongrass, galangal, and kaffir lime leaves, combined with succulent shrimp."
 - Insert a <blockquote> element containing a quote from Chef Somchai, a Thai cuisine expert, about the essence of Tom Yum Goong: "The key to a delicious Tom Yum Goong lies in the balance of flavors – sweet, sour, salty, and spicy."
 - Below the "Ingredients:" heading, create an unordered list with list items detailing the ingredients required for Tom Yum Goong. Include "Lemongrass: 2 stalks", "Thai basil: 1 cup", "Kaffir Lime Leaves: 3 leaves", and "Shrimp: 500g". Use to highlight the names of the ingredients.
 - Below the "Preparation:" heading, create an ordered list with list items detailing the steps for preparing Tom Yum Goong. Include:
 1. "Simmer the broth for 10 minutes."
 2. "Add lemongrass, galangal, and kaffir lime leaves."
 3. "Stir in shrimp and cook until pink."
 4. "Season with fish sauce, lime juice, and chili paste."
 5. "Garnish with Thai basil and serve hot."
 - Use to add emphasis to the words "Simmer", "Stir", "cook", "Season", and "Garnish".
 - Below the "Cooking Tips:" heading, create an unordered list with list items showcasing the following cooking tips:
 - "1/4 cup of fish sauce adds authentic Thai flavor."
 - "1 tablespoon of chili paste gives the soup its signature heat."
 - Use <sup> to denote serving sizes for spicy dishes and <sub> to indicate measurement units like teaspoons,

4. Body Section: Image and Table

- Insert an image with the source set to "https://edube.org/uploads/media/default/0001/04/thai-soup.jpg" and an alt attribute describing the image as "Tom Yum Goong".
- Add two line breaks to create space between the image and the rest of the content.
- Incorporate an HTML table with a caption stating "Recipe Details". Inside the table, include rows and columns to display ingredient names and quantities:
 - Create the first row, and within it, create table headers for "Ingredient" and "Quantity". These headers should appear at the top of their respective columns.
 - Add the second row, and within it, specify the content of the first cell, which should contain the ingredient "Lemongrass", and specify the content of the second cell, which should contain the quantity "2 stalks". Repeat this step for each ingredient along with its quantity, creating a new row for each ingredient-quantity pair.
 - After listing all the ingredients, create a new row with the colspan attribute set to "2". This will create a cell that spans across both columns. Inside this cell, add the text "Preparation Time: 20 minutes". Repeat this step for the following text: "Serving

Suggestions: Serve with steamed rice or jasmine tea."

5. Review and Test

- Review your webpage to ensure all elements are properly structured and displayed.
- Experiment and Customize – Feel free to experiment by adding additional information or elements to enhance the webpage if you wish.

Summarize

Chat

- Kaffir Lime Leaves: 3 leaves
- Shrimp: 500g

Preparation:

1. Simmer the broth for 10 minutes.
2. Add lemongrass, galangal, and kaffir lime leaves.
3. Stir in shrimp and cook until pink.
4. Season with fish sauce, lime juice, and chili paste.
5. Garnish with Thai basil and serve hot.

Cooking Tips:

- $\frac{1}{4}$ cup of fish sauce adds authentic Thai flavor.
- $\frac{1}{2}$ tablespoon of chili paste gives the soup its signature heat.

Recipe Details	
Ingredient	Quantity
Lemongrass	2 stalks
Thai Basil	1 cup
Kaffir Lime Leaves	3 leaves
Shrimp	500g

Preparation Time: 20 minutes

Serving Suggestions: Serve with steamed rice or jasmine tea.

Tom Yum Goong: A Spicy Thai Delight

Tom Yum Goong is a classic Thai soup renowned for its bold flavors and aromatic spices. This hot and sour soup features a tantalizing blend of lemongrass, galangal, and kaffir lime leaves, combined with succulent shrimp.

The soup is further enhanced with fresh chilies, which provide a fiery kick, and lime juice, lending a bright, refreshing acidity that perfectly balances the heat. Fish sauce adds depth and savory richness, while mushrooms contribute a tender texture and subtle umami flavor. Often garnished with fresh cilantro and sometimes a splash of chili oil or roasted chili paste, Tom Yum Goong delivers a complex harmony of spicy, sour, salty, and slightly sweet notes in every spoonful.

Both comforting and invigorating, this beloved soup is enjoyed not only for its vibrant taste but also for its aromatic qualities and reputation as a

Both comforting and invigorating, this beloved soup is enjoyed not only for its vibrant taste but also for its aromatic qualities and reputation as a warming, restorative dish. Whether served as a starter or a main course, Tom Yum Goong offers a true taste of Thai cuisine's bold character and masterful balance of flavors.

"The key to a delicious Tom Yum Goong lies in the balance of flavors – sweet, sour, salty, and spicy."

- Chef Somchai, Thai Cuisine Expert

Ingredients:

- Lemongrass: 2 stalks
- Thai Basil: 1 cup

Ingredient	Quantity
Lemongrass	2 stalks
Thai Basil	1 cup
Kaffir Lime Leaves	3 leaves
Shrimp	500g

Preparation Time: 20 minutes

Serving Suggestions: Serve with steamed rice or jasmine tea.

6. Conclusion

- After completing the activity, I was able to learn more tables and lists in the HTML. Where it is useful in creating ordered or unordered lists. It was very useful in making the html look more organized. In summary, I was able to learn the basics of creating lists and tables and putting information to it.

7. Assessment Rubric

Lab Activity Rubric								 	
Criteria		Ratings						Pts	
 SO 7 PI 1 Student Outcome 7.1 Acquire and apply new knowledge from outside sources. threshold: 4.8 pts		6 pts Excellent Educational interests and pursuits exist and flourish outside classroom requirements, knowledge and/or experiences are pursued independently and applies knowledge learned into practice	5 pts Good Educational interests and pursuits exist and flourish outside classroom requirements, knowledge and/or experiences are pursued independently	4 pts Satisfactory Look beyond classroom requirements, showing interest in pursuing knowledge independently	3 pts Unsatisfactory Begins to look beyond classroom requirements, showing interest in pursuing knowledge independently	2 pts Poor Relies on classroom instruction only	1 pts Very Poor No initiative or interest in acquiring new knowledge	6 pts	
 SO 7 PI 2 Student Outcome 7.2 Learn independently threshold: 4.8 pts		6 pts Excellent Completes an assigned task independently and practices continuous improvement	5 pts Good Completes an assigned task without supervision or guidance	4 pts Satisfactory Requires minimal guidance to complete an assigned task	3 pts Unsatisfactory Requires detailed or step-by-step instructions to complete a task	2 pts Poor Shows little interest to complete a task independently	1 pts Very Poor No interest to complete a task independently	6 pts	
 SO 7 PI 3 Student Outcome 7.3 Critical thinking in the broadest context of technological change threshold: 4.8 pts		6 pts Excellent Synthesizes and integrates information from a variety of sources; formulates a clear and precise perspective; draws appropriate conclusions	5 pts Good Evaluate information from a variety of sources; formulates a clear and precise perspective.	4 pts Satisfactory Analyze information from a variety of sources; formulates a clear and precise perspective.	3 pts Unsatisfactory Apply the gathered information to formulate the problem	2 pts Poor Gather and summarized the information from a variety of sources but failed to formulate the problem	1 pts Very Poor Gather information from a variety of sources	6 pts	
 SO 7 PI 4 Student Outcome 7.4 Creativity and adaptability to new and emerging technologies threshold: 4.8 pts		6 pts Excellent Ideas are combined in original and creative ways in line with the new and emerging technology trends to solve a problem or address an issue.	5 pts Good Ideas are creative and adapt the new knowledge to solve a problem or address an issue	4 pts Satisfactory Ideas are creative in solving a problem, or address an issue	3 pts Unsatisfactory Shows some creative ways to solve the problem	2 pts Poor Shows initiative and attempt to develop creative ideas to solve the problem	1 pts Very Poor Ideas are copied or restated from the sources consulted	6 pts	
Total Points: 24
