

Hands-on Activity 1.1 Styling a Simple Web Page	
Course Code: CPE-025B	Program: Computer Engineering
Course Title: Software Design 2	Date Performed: January 10, 2026
Section: BSCPE32S4	Date Submitted: January 10, 2026
Name: Adrian Justin M. Bulambao	Instructor: Engr. Neal Barton James Matira
1. Discussion	
Introduction to HTML - HTML serves as the skeleton of every website, wherein it provided it a structure and form. It sets up everything you see online, from text and images to forms and buttons. Without HTML, websites would just be plain text without any organization. HTML stands for: - Hypertext : is used to describe text that has links to other resources or documents. Hypertext in HTML enables users to click on links to move between different web pages. - Markup : refers to the tags or annotations used to specify a document's content formatting and structure. Headings, paragraphs, images, and links—all of which contribute to a visually appealing and user-friendly web page—are specified using markup tags in HTML. Web browsers can use these tags to determine how the content should be organized, styled, and displayed on the user's screen. - Language : refers to the set of guidelines and syntax that are used to consistently and uniformly write and interpret markup. HTML offers a collection of predefined tags and attributes that specify how a web browser should display and interact with content. It is the universal translator, the language that browsers, computers, and people can all understand. Working with HTML alone will make only a bland-looking website. It must be supported by CSS and Javascript. This trio always works together in creating an interactive website for every user. Since CSS is responsible for a website's appearance, including the layout, colors, and graphics that users see on the screen. Furthermore, Javascript is a programming language that is capable of making the elements in every website interactable and capable of data processing. From module 1, it talks about introduction of the HTML as well as introduction to a syntax for outlining an HTML and some HTML elements, tags, and components.	
2. Materials and Equipment	
Computer: it is used to access the course and run the website. Internet Connection: it is used to access course content Visual Studio: it is used in creating the website.	
3. Procedure	
Scenario Bloom & Petal Haven is a neighborhood flower shop known for its beautiful flower arrangements and indoor plants. They want to start selling their products online. The shop offers a variety of flowers, plants, and plant accessories for people who want to decorate their homes or surprise their friends and family with special gifts.	

As part of the interview process for the Front End Developer position at Bloom & Petal Haven, you've been asked to show your skills by **creating a simple and minimalist webpage** using HTML.

Your job is to make a basic webpage that features two of their popular indoor plants: the Peace Lily and the Zanzibar Gem. The webpage should give some details about each plant, like a short description and price. Also, it should have nice pictures to catch people's attention.

Instructions

Follow the instructions below to create the webpage step by step:

1. Set Up the Basic Structure

- Start by creating a new HTML file and name it index.html.
- Begin your HTML document with the DOCTYPE declaration to specify the HTML version you'll be using – HTML5.
- Then, enclose the entire content of your webpage within the <html> tags.

2. Head Section

- Create the <head> section of your HTML document. Inside the <head> section, set the title of your page to "Indoor Plants" using the <title> tag.
- Add meta descriptions for your page using <meta> tags. Include the following:
 - Name: Set the name attribute to "description."
 - Content: Set the content attribute to the following description of the webpage: "Explore a variety of indoor plants for your home or office."

3. Charset Encoding

- Set the character encoding for your webpage to UTF-8 using the <meta> tag. This ensures proper display of special characters

4. Body Section

- Create the <body> section of your HTML document. Within the <body> section, start by adding an <h1> tag with a title for your webpage, such as "Indoor Plants".
- Next, add two <h2> tags – one for each plant name: "Peace Lily" and "Zanzibar Gem".
- Following each <h2> tag, add a <p> tag containing a short description of the plant:
 - For the Peace Lily: "The Peace Lily, known for its elegant white flowers, is a popular choice for indoor spaces."
 - For the Zanzibar Gem: "The Zanzibar Gem, with its glossy green foliage, is a low-maintenance indoor plant perfect for beginners."
- Insert another <p> tag after the description to display the price of each plant:
 - For the Peace Lily: "Price: \$15"
 - For the Zanzibar Gem: "Price: \$20"
- Following the price, incorporate an image of the plant using the tag, with the location of the image file specified in the src attribute, and the name of the plant provided in the alt attribute:
 - For the Peace Lily – source:
"https://edube.org/uploads/media/default/0001/04/spathiphyllum-peace-lily.jpg",
alternative text: "Peace Lily".
 - For the Zanzibar Gem – source:
"https://edube.org/uploads/media/default/0001/04/zamioculcas-zanzibar-gem.jpg"

", alternative text: "Zanzibar Gem".

5. Review and Test

- Review your webpage to ensure all elements are properly structured and displayed.
- Experiment and Customize – Feel free to experiment by adding additional information or elements to enhance the webpage if you wish.

4. Output

5. Supplementary Activity

6. Conclusion
- From this activity, I was able to learn how to create an html, which is the barebones of every website. Furthermore, I was able to design my own shop website, though it is not functional, I was able to learn the basics of creating an html like putting designs and images to it.
7. Assessment Rubric

Lab Activity Rubric								 	
Criteria	Ratings							Pts	
 SO 7 PI 1 Student Outcome 7.1 Acquire and apply new knowledge from outside sources. threshold: 4.8 pts	6 pts Excellent Educational interests and pursuits exist and flourish outside classroom requirements,knowledge and/or experiences are pursued independently and applies knowledge learned into practice	5 pts Good Educational interests and pursuits exist and flourish outside classroom requirements,knowledge and/or experiences are pursued independently	4 pts Satisfactory Look beyond classroom requirements, showing interest in pursuing knowledge independently	3 pts Unsatisfactory Begins to look beyond classroom requirements, showing interest in pursuing knowledge independently	2 pts Poor Relies on classroom instruction only	1 pts Very Poor No initiative or interest in acquiring new knowledge	6 pts		
 SO 7 PI 2 Student Outcome 7.2 Learn independently threshold: 4.8 pts	6 pts Excellent Completes an assigned task independently and practices continuous improvement	5 pts Good Completes an assigned task without supervision or guidance	4 pts Satisfactory Requires minimal guidance to complete an assigned task	3 pts Unsatisfactory Requires detailed or step-by-step instructions to complete a task	2 pts Poor Shows little interest to complete a task independently	1 pts Very Poor No interest to complete a task independently	6 pts		
 SO 7 PI 3 Student Outcome 7.3 Critical thinking in the broadest context of technological change threshold: 4.8 pts	6 pts Excellent Synthesizes and integrates information from a variety of sources; formulates a clear and precise perspective; draws appropriate conclusions	5 pts Good Evaluate information from a variety of sources; formulates a clear and precise perspective.	4 pts Satisfactory Analyze information from a variety of sources; formulates a clear and precise perspective.	3 pts Unsatisfactory Apply the gathered information to formulate the problem	2 pts Poor Gather and summarized the information from a variety of sources but failed to formulate the problem	1 pts Very Poor Gather information from a variety of sources	6 pts		
 SO 7 PI 4 Student Outcome 7.4 Creativity and adaptability to new and emerging technologies threshold: 4.8 pts	6 pts Excellent Ideas are combined in original and creative ways in line with the new and emerging technology trends to solve a problem or address an issue.	5 pts Good Ideas are creative and adapt the new knowledge to solve a problem or address an issue	4 pts Satisfactory Ideas are creative in solving a problem, or address an issue	3 pts Unsatisfactory Shows some creative ways to solve the problem	2 pts Poor Shows initiative and attempt to develop creative ideas to solve the problem	1 pts Very Poor Ideas are copied or restated from the sources consulted	6 pts		
Total Points: 24
